*cont'd*

an insulating substrate;

a gate wire formed on the substrate;

a gate insulating layer covering the gate wire;

a data wire made of one of either molybdenum or molybdenum alloy and formed on the gate insulating layer;

a supplementary data wire located either on or under the entire data wire and made of either molybdenum nitride or molybdenum alloy nitride;

a passivation layer formed on the data wire or the supplementary data wire; and

a pixel electrode formed on the passivation layer and connected to the data wire through a contact hole formed in the passivation layer.

---

*32*

21. (New) The liquid crystal display of claim 14, wherein the pixel electrode is made of indium tin oxide (ITO).

---

Attached hereto is a marked-up version of the changes made by the current Amendment.

The attachment is captioned "**Version with Markings to Show Changes Made**".

### ***Conclusion***

It is respectfully requested that this amendment be entered prior to the examination of the above-referenced patent application. It is believed that no new matter is added by this
